About Me

I am a dedicated, try hard individual and am very passionate about my ethics and my work. I try to be honest in every situation of my life which is something I have learnt from my parents. I am very confident about my adaptability and my learning skills which I have honed over the years. I am very sincere about my work and place it above all else.

Projects

Crafter

Mini Project

- *Crafter is a sandbox-style game developed to offer players an immersive and creative gaming experience on a smaller scale akin to Minecraft.*
- *It provides a platform where players can explore, build, and interact with their environment in a pixelated, blocky world.*
- *Players have access to an extensive array of blocks and tools to build and design their own structures, landscapes, and environments.*
- *The idea for Crafter was born out of the desire to create a more compact and accessible sandbox game inspired by the success of Minecraft.*
- *We as a team created initial prototypes to experiment with core mechanics, art style, and gameplay elements.*
- *I majorly contributed to the development of gameplay mechanics, level design, art assets.*
- *Participated in playtesting, debugging & optimization to ensure quality and functionality of the game.*

EA Sports

- *Developed a static clone of the EA Sports website using HTML and CSS. Implemented responsive design and advanced CSS techniques to create an engaging user experience.*

E-commerce Website (React) (In Progress)

- Developing a responsive eCommerce website using React, implementing dynamic product listings, shopping cart, and user profile features. Integrating JSON Server, RESTful APIs, and React Router for seamless navigation and functionality.
